Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Claim Rejections - 35 USC § 112***

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 7 the term "paper" lacks antecedent basis.

Specification

On page 1, first paragraph page 2, second and third paragraphs, page 5 second paragraph and page 10 last paragraph the status of the patent application should be updated.

Drawings

The specification on page 10, last paragraph refers to Fig. 2 and describes the fibrous layer to be 24 and the laminate 30'; however, the numerals 24 and 30' are not shown in Fig. 2.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1775

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 22-45 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,171,705 and claims 1-17 of US Patent 5,985,457. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations recited in the present claimed invention are encompassed in the claims of US Patent nos. 6,171,705 and 5,985,457. The only difference is that the fibrous layers recited in the patents comprise paper and synthetic polymer and the fibrous layers recited in the instant claimed invention comprise natural fibers such as cotton, linen, hemp, straw and mixtures thereof. Since, the claims of the patents recites the fibrous layers may be made from a paper which is made from a natural product, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to have selected other compatible natural fibers such as cotton, linen, hemp, straw and mixtures thereof as recited in the claims of the present claimed invention, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use. Absent a showing of unexpected results the claims in the subject application are not seen to provide patentable distinction over the claims of the above identified US Patents.
